About Sarah

Sarah focuses her practice on estate planning, business planning, and real estate. She assists individuals and business owners by implementing a plan for their finances, healthcare, and legacies in the event of their disability or death. Much of her practice involves the drafting of wills, trusts, deeds, and business agreements, and assisting clients through guardianship, probate, and trust administration matters in Ohio and Florida.

Sarah's clients seek her counsel throughout all phases of life - from the humble beginnings of their careers and families, through retirement and beyond.

Sarah attended the College of Wooster on a full writing scholarship. Always in search of a story, she often found herself in surprising conversations with surprising people, including poets in rural Mexico, religious leaders in Ukraine, and business people from all over the world. She now takes pleasure in having meaningful conversations with her clients and drafting documents that will play an integral role in their legacies.
